VPDome™

RACK COVER FOR CLONING

CLONE	VEG	FLOWER
🔥		

- VPDome™ is the most efficient way to clone.
- Easy-to-install fabric rack cover holds 16 standard clone trays.
- No need for individual tray domes.
- Simple operation streamlines nursery workflow.
- 2-4 hours labor savings per month per rack.
- Uniform and consistent VPD reduces mortality and speeds rooting.
- Durable construction reduces costly plastic dome replacements.
- Anti-microbial coating reduces disease vectors.
- Magnetic door closures click shut and never break.
- Bottom rack cover locks in humidity
- Holders for multiple types of temperature and humidity sensors
- Slots for light bar cables
- Only for use with low-heat LED light bars (no T5)
- 1-year manufacturer warranty

Cuts

ROOTING GEL

CLONE	VEG	FLOWER
🔥		

- Easy to use
- Unique squeeze tube packaging keep product sterile
- Only use what you need without contaminating or wasting remaining product
- Sticks to stems better than competitors
- Optimal gel consistency
- No pouring or scooping
- Not clumpy/slimy like competitors
- Can be added directly to aerocloner reservoir
- Eco-friendly squeeze-tube uses less packaging
- Non-staining formula
